PROFESSIONAL SUMMARY

Full stack application developer specializing in React, React Native and Node. Currently working on a remote team creating native applications with the goal of educating and keeping children safe while online. In the past year and a half working for a startup, I have gone from part time jr. front-end developer to the Lead front end/Project Manager. Ideally now, looking for an environment where I could fill a role as a mid-level developer. In this position I will quickly make valuable contributions to the project, help mentor newer developers and learn what I can from the senior developers.

SKILLS

ADVANCED: JavaScript, ReactJS, React Native, Node.js, REST-API, CSS/SASS, HTML, CMS(Butter)

INTERMEDIATE: TypeScript, MongoDB, Docker, Python, GraphQL, Apollo, BootStrap, Svelte, CI/CD, Gatsby, Angular

LEARNING: Cloud Services/AWS, Django, Machine Learning, WordPress

PROJECTS

Protect: Internet Safety Educational- For parents and children [Protect App](#)

- Served as lead front end developer building all aspects of the application using React Native
- Communicated frequently with the client, designer, and content creators to achieve the desired result
- Worked through many iterations including design updates and new features
- Implemented localization to display entire app in English and Spanish
- Created with – React Native, TypeScript, Redux, .NET, Butter (CMS), Sentry, i18n

Village Social media application

- Worked on small team to develop a robust social media application to be an alternative to the main options with no advertising, and safety being the main concern
- Engaged directly with the startup owner on a daily basis, as well as coordinating an international team of designers and developers

- Created with – React Native, TypeScript, Pusher, .NET api, Azure blob store, Redux, Sentry

EXPERIENCE

Lead Front-end Developer, Village Social 04/2020 – 07/2021

- Helped to build two React Native projects from concept to production
- Communicated daily with small international team of developers and designers
- Outlined requirements for back-end and worked back and forth with our .NET developers
- Participated in weekly stand-up meetings with the startup owner and clients
- At time of leaving both applications had a 4.5-5-star rating on both platforms

Brewer, Chainless Brewing 04/2019 – 11/2019

- Crafted over a dozen varieties of beer in a 6-month period involving all stages from recipe to pour.
- Deemed the unofficial IT employee, maintaining all tech from the brewhouse to office and AV in taproom.
- Assisted in the business startup: business plan, licenses, building setup

Floor Lead, Purgatory Ski and Snowboard Shop 11/2010 – 04/2019

- Upgraded shop from all paper system to all digital system comprised of over 30 cashier/technician stations and an inventory management system to track over 6k equipment items.
- Involved in management team that oversaw multiple shops and 60 employees
